

# Cinecav™

## Closed Caption Fonts

### A royalty-free solution for the closed caption font requirements mandated by the FCC

Cinecav™ Closed Caption Fonts provide the best and most affordable typefaces for closed caption display. Most font suppliers deliver re-packaged fonts that are unsuitable for closed captions. The Cinecav™ family (pronounced SI-ne-kahv) is the first set of fonts designed specifically to meet FCC EIA-708B requirements. They are more elegant, more legible, and more consistently designed for television applications than fonts provided by other suppliers and have been tested and refined on several DTV platforms. The font set also includes Cinecav™ UI, designed specifically for guide information and menu systems where space efficiency and legibility are extremely important.

Cinecav™ UI - An efficient font for guide data display and GUI menus

**How Quickly Daft Jumping Zebras Vex.**

Cinecav™ Sans - (708B) Proportionally Spaced Sans Serif

**How Quickly Daft Jumping Zebras Vex.**

Cinecav™ Mono - (708B) Monospaced Sans Serif

**How Quickly Daft Jumping Zebras Vex.**
